

Drum Rotator 1000kg - Crane Attachment

Usage

This unit allows the emptying and rotating of 205L steel drums with the use of an overhead crane. Drums can be rotated a full 360 degrees. Suitable for use up to 3m above ground

Features & Benefits

- Rotation carried out by a manual hand chain
- Belly strap and eccentric lock securely holds the drum in position, with a locking pin to prevent accidental release
- Large chain driven gearbox provides automatic braking when the operator stops pulling the chain, preventing uncontrolled movements
- Zinc finish
- For use with forklifts and overhead cranes

Specifications

Model 116400006

Working Load Limit: 1000kg

Unit Weight: 220kg

Rotation Shaft CL to Lifting Eye: 940mm
